

AUTO PICLE S

Overview

The Auto Picle - S is a motorized oxy-fuel pipe cutting machine with remote control. The special fixed rail for the torch guidance system provides high cutting accuracy even for large pipes. Due to the constant traveling speed, high quality cutting surface can be achieved. Various bevel angles are available by adjusting the angle on the torch holder scale. Changes in the pipe diameter are easily made by adding or removing chain links as needed.

Feature

- High accurate cutting achieved by the guide rail.
- Vertical pipe cutting is possible by using the guide rail.
- Add or remove chain's links as needed according to the pipe diameter.
- Operate machine away from cutting area is possible by the remote control.

AUTO PICLE S - Main Specification

Cutting Thickness	5~50mm
Bevel Angle	0~45°
Cutting Speed	100~700mm/min
Effective Pipe Cutting Diameter	φ150~600mm φ400~600mm (using rail model 600) φ600~900mm (using rail model 900) φ900~1200mm (using rail model 1200) φ1200~1500mm (using rail model 1500)
Drive Method	PWM Control
Power Supply	Various voltage type is available
Wheel Width	230mm
Height	400mm
Weight	15kg
Operation Box	Pendant type
Cutting Tip	106 #0, 1, 2
Supplied Chain	80 links (equivalent to 2.4m)

Main Components and Accessories

- Cutting Machine Main Body [AUTO PICLE S]
- Chain (80 links)
- Power Cable (5M)
- Instruction Manual
- Fuse
- Wrench
- Cutting Tip Cleaner
- Cutting Tip 106 #0, 1, 2
